Subject: Proposed changes for zoning

Hello Ms. Wiser:

This letter is in regard to proposed changes to repel R-10 back to R-20. I do understand the restraints the planning commission is enduring, but my husband and I respectfully disagree with this motion. I believe the Clark County voters have already voiced their opinions on this matter and stand firm that R-10 should stand. Most of us who live on 20 acres are neither in the lumber or agriculture business.

Most property owners try to be the best stewards of their land, planting trees, eradicating noxious weed, creating riparian zones by creeks, etc... but, being single working house holds the job is burdensome. As I see it there are plenty of buffers to Natural Resources in our county even on 10 acres. Perhaps the county could even purchase and maintain the 10 acre sites as they get subdivided. Also so many families have possessed their acreage for generations, always with the intentions to divide it up for future descendants. I urge you to once again reconsider this proposition.

Sincerely,

Patti and Wayne Torjusen
