BEST AVAILABLE SCIENCE REFERENCES

This file contains all of the references from the King County Best Available Science (BAS) reports, Volume I: Review of Science Literature and Volume II: Assessment of Proposed Ordinances. The BAS reports were produced as part of the proposed Critical Areas, Stormwater, and Clearing and Grading Ordinances. Below, the references are grouped under the chapters that correspond to the BAS reports.

Best Available Science – Volume I, Review of Science Literature

Chapter 1: Introduction

King County, The 2002 King County Annual Growth Report, http://www.metrokc.gov/budget/agr/agr02/
King County, 2002 Benchmarks Report, 2002a
King County Comprehensive Plan, update 2002b http://www.metrokc.gov/ddes/compplan
Washington Administrative Code (WAC) 365-195-900 to 925.

Chapter 2: Scientific Framework

Chapter 3: Flood Hazard Areas

King County. 1993. King County Flood Hazard Reduction Plan. Final. King County Department of Public Works, Surface Water Management Division, Seattle, Washington.

Chapter 4: Channel Migration Zones

King County, 1993. Flood Hazard Reduction Plan.

King County, 1999. Channel migration public rule.

Shannon and Wilson, 1991. Tolt and Raging Rivers channel migration study, King County, Washington, with maps. Prepared for Surface Water Management Division, King County Department of Public Works, Seattle, WA by Shannon & Wilson, Inc., Seattle, WA.

Chapter 5: Geologic Hazard Areas

Seismic Hazard Areas:

Atwater, B. F.; Grant, Wendy, 1987 Holocene subduction earthquakes in coastal Washington

University of Washington, Department of Geophysics, Tsunami! Website, 2000.

Rasmussen, N. H.; Millard, R. C.; Smith, S. W., 1974, Earthquake hazard evaluation of the Puget Sound region Washington State: University of Washington Dept. of Earth and Space Sciences

Reinhart, M. A.; Bourgeois, Joanne, 1987, Distribution of anomalous sand at Willapa Bay, Washington- Evidence for large-scale landward-directed processes [abstract]: EOS (American Geophysical Union Transactions), v. 68, no. 44.

**Erosion Hazard Areas:**

Coastal Engineering – Coastal Hazards – Sea Grant Program – various publications, University of Wisconsin, 2002

King County, 1990. Sensitive Areas Map Folio;

Soil Survey – King County Area Washington, United States Department of Agriculture, Soil Conservation Service, Issued November 1973

Terzaghi & Peck, *Soil Mechanics in Engineering Practice,* Wiley & Tuttle, 1948

University of Washington, King County, WSDOT, 2002. Regional Road Maintenance Endangered Species Act Program Guidelines;

**Landslide Hazard Areas:**

**Volcanic Hazard Areas:**

Coal Mine Hazard Areas:

Amuedo and Ivey, Coal and Clay Mine Hazard Study and Estimated Unmined Coal Resources, Jefferson County, Colorado, 1978

King County, 1990. Sensitive Areas Map Folio.

Chapter 6: Critical Aquifer Recharge Areas

Barrett, Michael, “Re: Risk of GW contamination from infiltration BMPs.” E-mail to Multiple recipients of list. 20 Dec 2002.

References

King County. 1995. Mapping Aquifer Susceptibility to Contamination in King County. King County Dept. of Development and Environmental Services, Seattle, WA.

King County. 1993. Best Management Practices for Golf Course Development and Operation. King County Environmental Division, Seattle, WA.

Potts, A. 2002, Dec 13. “Risk of GW contamination from infiltration BMPs.” E-mail to Multiple recipients of list.
